

## 1. "All Sites" mode:

To assign users of groups with the same name across site collections. The generated roles will be:

Team 1 | Viewers  
Team 2 | Viewers  
Team 1 | Approvers  
Team 2 | Approvers

## 2. "Site Collection" mode:

To assign users of the specific group under this particular site collection name for page access. The generated roles will be:

Team 1 | Viewers  
Team 2 | Approvers

## 3. "Specific Web Application" mode:

To assign users of the specific group under this particular site collection on this SharePoint server for page access. Most restrictive option from Web Application perspective. The generated roles will be:

company.com | Team 1 | Viewers  
company.com | Team 1 | Approvers
